

# bCyberwise Booster Session 3 - Assessment Task

## Learning Intention:

Today we are: identifying strategies to keep ourselves and others safe online

So we can: help to educate others about online safety

I will know I have been successful: when I create a poster or short play about online safety.

### Assessment Task:

Create a poster, or short play in small groups around the topic of cybersafety.

You may like to include some helpful tips and information:

- including suggested age restrictions for apps or games
- websites that kids can access if they need help online
- ways to stop cyberbullying
- people who can help you with cybersafety

You may like to get creative and design your poster digitally on PowerPoint, Word, Canva or another program.

Alternatively, you might like to use cardboard, textas, and other media.
